

## Appendix D: Action Graphics

This appendix identifies a set of graphic images for common toolbar actions performed by Motif and MS Windows applications. Appendix E provides information on size and format requirements for application icons. If the application is unable to use the images indicated here, it is to select images with a similar appearance (e.g., a pair of scissors to represent Cut).

Images in .xpm format and 24 x 24 pixel size can be downloaded from the Software Developer's Kit for version 1.0 of the Theater Battle Management Core Systems (TBMCS) Program ([http://www.ccs.lmco.com/html/sdk/html/sdk\\_home\\_page.html](http://www.ccs.lmco.com/html/sdk/html/sdk_home_page.html)); images in .bmp format can be found in the Visual Basic Toolkit. The table below identifies the images by file name and provides an example of each. The application can use any of the other images available in the Visual Basic Toolkit to represent the actions indicated in the toolkit.

<u>Action</u>	<u>Motif File Name</u>	<u>MS Windows File Name</u>	<u>Image</u>
New	new_24.xpm	New.bmp	
Open	open_24.xpm	Open.bmp	
Close	close_24.xpm		
Save	save_24.xpm	Save.bmp	
Print	print_24.xpm	Print.bmp	
Cut	cut_24.xpm	Cut.bmp	
Copy	copy_24.xpm	Copy.bmp	
Paste	paste_24.xpm	Paste.bmp	
Help	help_24.xpm	Help2.bmp
